# AddressDoctor®

## Data Quality Center

240 Countries  
1 Solution

## Addressing excellence. Helping you succeed in a globalized world.

### AddressDoctor Data Quality Center

With the AddressDoctor Data Quality Center (DQC), you can correct your address data whenever you wish. The self-service tool checks and formats your addresses and enriches them by adding supplemental information.

A few mouse clicks is all it takes to load your address database through a secure link (SSL) to the strictly protected online portal. Automatic analysis of your data begins at once, with a quality report provided **free of charge**.

If you are satisfied with the results, download your corrected addresses for a nominal fee.

With this fully automatic technology for addresses from more than 240 countries, you will experience a new independence and price transparency.

### At a glance

- | Online portal for verification and correction of your address databases.
- | Supports a wide variety of different formats.
- | Accessible 24 hours a day.

### Many supplemental features and functions including:

- | **Finding duplicates:** Marks potential duplicates.
- | **Relocation checking:** Automatically provides the recipient's new address.
- | **Deceased checking:** Prevents unnecessary returns.
- | **Geocoordinates:** Supplements coordinates in the WGS 84 system, in the same way as your navigation system.
- | **Socio-demographic characteristics:** Supplies information on housing structure and purchasing power.

### Sample applications

- | Direct marketing: Check mailing addresses, even just before mailing.
- | Carry out location analyses.
- | Help with structural analysis of buyers.
- | Update your CRM data.
- | Also available as white label solution.

### Benefits

- | Independence from a service provider's working hours.
- | Fast, automatic processing.
- | Correction of addresses from any countries – even in mixed files.
- | A definitive report on data quality, free of charge.
- | Easy payments via direct debit or credit card.
- | Cost transparency.

### How Deutsche Post Adress uses AddressDoctor

Since 2005, Deutsche Post Adress has successfully used the AddressDoctor DQC for speedy and accurate processing of customer orders. Jörg Schneider, International Sales Director at Deutsche Post Adress says "With AddressDoctor, we can process multi-country files in a single step. We know of no other provider that offers professional address checking for so many countries."

AddressDoctor is also used by these leading companies (excerpt):

1&1 Internet AG · AdPepper · DataFlux · Experian QAS · IBM · Kempinski Hotels · Micros · Nintendo · Steigenberger Hotels · Swiss Post International
