## New York

Like a needle in the haystack. How does a letter get delivered in New York? As in many other major cities, only with a correct address.

## Did the pyramids have zip codes?

Probably not four thousand years ago. Today, they do. Back then, camels marched along the pyramids. Today, automobiles clog the streets of Giza.

More than six billion people are crowded together on our planet. And they all have an address. AddressDoctor keeps the addresses in your database in order. Address formats, characters sets and outlying villages – AddressDoctor knows it all.

People move, zip codes change. Even the best database is not immune to input errors. Just like architectural treasures, addresses soon lose their value without regular upkeep. The more international your records, the more likely you are to have problems.

AddressDoctor is the specialist for address quality. Whether Tokyo or Upper Grandview, AddressDoctor keeps your addresses clean. Automatically.

## Data, data, data

### The international reference directory

AddressDoctor evolved from a passion for quality. In the early nineties, experts started to put the first reference data together. Since then this information has been continuously updated. Gigabytes of compressed information on zip codes, places, streets, provinces and post office boxes from 240 countries.

Current news and coverage information:

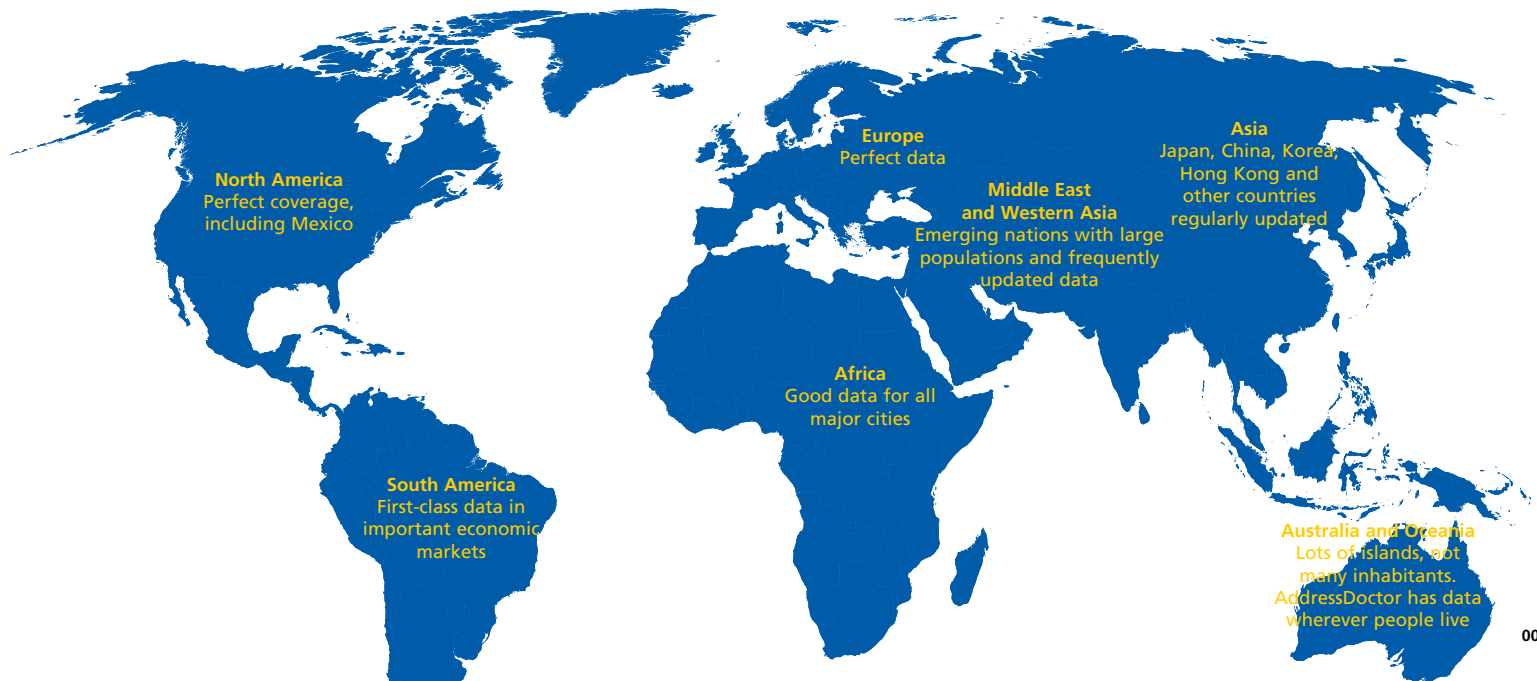

[www.AddressDoctor.com/countries](http://www.AddressDoctor.com/countries)

### A global network of reliable suppliers

The reference data is updated monthly. Top class suppliers – often the postal companies – are selected according to strict criteria. Top quality guaranteed.

### Unique data enhancement

Geographic data, change of address, Robinson lists, and phone append. There are many ways to enhance your data. It's quick and easy with the AddressDoctor Information Hub. Online. 24 / 7.

ΑΘΗΝΑΣ 63  
105 52 ΑΘΗΝΑ  
GREECE

AddressDoctor converts your addresses from one alphabet to another.  
In both directions.

ATHINAS 63  
105 52 ATHINA  
GREECE

For example from Greek to Latin script and vice versa.  
For seven important alphabets.

### Polyglot

AddressDoctor understands many foreign scripts. Transliteration converts characters and words of one language into another. A Greek address is converted to a Latin script equivalent. And vice versa.

Send your mail to Chiba-Shi or Little Rock.  
AddressDoctor is your expert for the whole world.

### All countries, one API

Imagine a travel adapter. Use the right plug to power up your laptop. In much the same way, AddressDoctor adapts to all the world's address formats.

Don't worry about international differences. AddressDoctor understands more than 100 different address formats. Whether canton, county, state, province or prefecture. AddressDoctor knows what to do and handles the details.

## Berlin

The largest city in Germany with a long and varied history. It grew together from quarters with their own traditions and often identical street names. Which "Hauptweg" is it? The one in Charlottenburg or the one in Spandau? Or could it be in Adlershof or even Wittenau?

## About us

### Expertise and reliability

Put your trust in AddressDoctor. Proven algorithms and innovative techniques correct your addresses as if you'd done it yourself. Just much faster. If need be, millions of times an hour.

Over the last ten years, experts from all over the world have continuously added their experience and further improved AddressDoctor.

### Market leader with long years of experience

Leading software providers have integrated AddressDoctor ([www.AddressDoctor.com/references](http://www.AddressDoctor.com/references)). They offer the solution as part of their own products. Hundreds of customers worldwide put their trust in AddressDoctor to handle their data the way they want it.

AddressDoctor is a German based software company. The technology is the result of inventive talent and consistent refinement.

Service and sales are available globally.

Simple, flexible and  
reliable from

# S-X

### **Knowledge and expertise included**

Find a zip code or implement a complex master data management project. AddressDoctor helps you with the knowledge about millions of addresses. Years of research and a gigantic database make AddressDoctor unique. The intuitive interface makes it child's play to use. No need to pore through heavy manuals.

### **Flexible use and integration**

Using the software or Web Services is quick and easy. They can also be combined when needed. Website, call center, mailing. Wherever addresses are processed, AddressDoctor is there to support you.

### **Reliable software and Web Services**

Quality creates confidence and saves money. AddressDoctor software is developed with dedication. That same dedication goes into quality assurance. Automatic and manual checks find any irregularity. You can also rely on the availability of the Web Services. Monitored round the clock, their availability has been outstanding since 1999. Check it yourself. Any time. Online.

### **Affordable performance**

Fair prices and the modular structure of the software components make AddressDoctor available whatever your budget. Put the two together for a solution at an unbeatable price.

Amman, Jordan

In the Middle East, mail is delivered to post offices boxes.  
Almost always. Where does your mail go?

## AddressDoctor in the office and at home

### Looking up, formatting, sorting

Maddening little jobs that eat up time. Where do you look up zip codes? Where do you put the postal code in a Swedish address?

Find out. With AddressDoctor.

### Worldwide zip code lookup

Find zip codes for anywhere in the world quickly and with certainty. Edinburgh or Eddinborough?

Error tolerance, a feature of all AddressDoctor products, helps you find the answer.

A great tool for your intranet, AddressDoctor's zip code lookup also displays the correct address formats.

### AddressDoctor for Excel

Cleanse small and large address lists quickly with AddressDoctor for Excel. Virtually without setup.

Try it out. You'll be amazed just how much incorrect data your "clean" list contains.

[www.AddressDoctor.com/s](http://www.AddressDoctor.com/s)

## AddressDoctor Data Quality Center

### Cleanse and enrich

The Data Quality Center opens up a new dimension in data processing. Correcting addresses. Locating duplicates. Change of address check. Geographical coordinates and much, much more. You can use the Data Quality Center around the clock including weekends.

All you need is a browser and you can upload your data for a checkup free of charge. You soon receive your free data audit. This tells you just how good (or bad) your data really is.

You decide which services you want to use.

[www.AddressDoctor.com/m](http://www.AddressDoctor.com/m)

London  
British postal codes are complicated. Really?  
Once you understand them, you'll be surprised what they  
can do. Try it with AddressDoctor FastCompletion.

## AddressDoctor Web Services

The AddressDoctor Web Services have been available since 1999. Every year they check millions of addresses. And what's more: You don't need to make a major investment to have access to the full functionality of the AddressDoctor software – for any number of countries. You only pay for the queries you make.

Three different Web Services support either individual checks or bulk processing.

**Interactive** helps to capture correct addresses and to avoid fraud in websites and online shops.

**FastCompletion** is the right choice in a CRM or ERP system. Call center agents are delighted by the fast capture of addresses from all over the world.

**Batch** handles even the largest address databases.

Leading software manufacturers have integrated these functions in their software.

[www.AddressDoctor.com/L](http://www.AddressDoctor.com/L)

Mexico City – Ciudad de México  
Poor or rich? A land of contradictions, where you can still find traces of old cultures. Colonias, Barrios, Delegations. One of the most populous cities in the world put together in a myriad of jigsaw pieces.

Beijing

You can't talk to the taxi driver.

A note with a few squiggly characters is your safety line back to the hotel. To a world you understand.

With AddressDoctor, you suddenly find you can read Chinese.

## AddressDoctor software components

A favorite of software manufacturers and businesses that need maximum flexibility. The software components are the basis for all other AddressDoctor products. They can be integrated easily into other applications and installed locally.

Interfaces for C, C++ and Java allow communication with all commonly found systems. On Windows and Unix, with 32 or 64 bits, on one processor or several. You've got plenty of options.

And yet AddressDoctor is integrated in no time. Within a few hours, you'll be familiar with the concept and will have written your first application. Days of training and laborious poring over manuals are a thing of the past.

Take advantage of lower mailing rates. Comply with the CASS rules of the USPS for example. Your application communicates directly with the components for high-speed processing. Storing the reference data on your computers means maximum security – your data never needs to leave the safe haven of your own network.
