## Why AddressDoctor for Excel®?

If you are working with addresses you know this problem: Addresses are often incomplete, inaccurate and even out-of-date. AddressDoctor for Excel® rapidly validates, corrects, and formats your address lists, no matter how long they are.

After an easy installation, you can validate your address data in a few minutes. In order to correct the addresses, the Add-In connects to the AddressDoctor servers and compares each address with the most up-to-date reference data. Results of the address validation are then made available in real-time. Start your free trial today.

## At a glance

- | Automatically validate and correct postal addresses
- | Small download (1.3 MB) and quick installation
- | Detailed statistics
- | Productive in only some minutes
- | 24/7 availability
- | No contract obligations
- | Supports Excel® 2003 and 2007
