1 Solution

## Worldwide Geocoding

Geocoding is a beneficial component for route planning and distance evaluation. It also provides risk assessment for the insurance business.

**AddressDoctor offers automated geocode enrichment in WGS 84 format.**

AddressDoctor GmbH, Roentgenstr. 9, 67133 Maxdorf, Germany

### Why AddressDoctor Geocoding?

With integrated geocoding, AddressDoctor provides superior quality and accuracy. Testing has shown that AddressDoctor's powerful address correction improves geocoding accuracy by up to 20 percentage points. A convenient status code indicates the geocoding accuracy for each individual address.

### At a glance

- | Superior geocoding due to integrated address validation and correction
- | Output in WGS 84 format
- | Available for many countries supported by AddressDoctor
- | Accuracy up to building number level
- | Quarterly updated data

### LateRooms.com about AddressDoctor Geocoding

"In order to provide customers with accurate information about the geographical location of the hotels, correct geocode data is important for our online booking system."
