AddressDoctor products are modular. There is a perfect solution for each challenge.

Solutions for a globalized world

AddressDoctor Software Library

AddressDoctor, the specialist in international address checking, offers Version 5 of its powerful Software Library.

The Software Library can be used to correct addresses from a single country or the whole world. More than 10 years of experience have gone into developing this easy to integrate component.

The solution is recommended for large volumes of data or time-critical applications. Even with conventional hardware, it enables processing of several million addresses per hour.

Reference data packages, updated monthly, are available for individual countries or the whole world.

The AddressDoctor Software Library is integrated into the products of leading software manufacturers. It can also be easily combined with the AddressDoctor Web Services.

How MRM Worldwide uses AddressDoctor

MRM Worldwide is one of the world's leading direct-marketing agencies. The company uses the AddressDoctor Software Library to verify, standardize and correct addresses in Japan. Mark Woodcock, Asia Pacific Regional Director of Data & Analytics at MRM Hong Kong says „For us, the key factors involved in choosing a provider of address-cleanup services were precision, pricing, and the scope and level of detail of the reference data. AddressDoctor meets our requirements in every respect.“

AddressDoctor is also used by these leading companies (excerpt):
